

Introducing The Retail Blade Kiosk Solution

The DigiPoS Kiosk: Self-Service Made Easy

Introducing the latest addition...

DigiPoS Store Solutions have been at the forefront of Retail Technology for over thirteen years bringing the product and support demanded by Retailers. Over the past eight years the award-winning technology team have been behind world class products such as the PowerPoS and Retail Blade. Expanding the range, the DigiPoS Retail Blade Kiosk solution now brings all the benefits of Retail Blade technology to self service Retailing.

Can I have ONE consistent, standard system platform for my POS, Back Office, and my Kiosk solution?

The answer is YES! With the DigiPoS Powered Store, you can experience:

- Reduced service costs due to having ONE consistent platform throughout your store.
- Higher uptime with the easiest system to upgrade or maintain on the market so service to your customers remains un-interrupted.
- Peace of mind knowing that wasted technician time and costs are a thing of the past. ONE system solution - from POS systems and software to back office servers, to self service and kiosk systems - ultimately help to keep thousands of dollars in your pocket.

When you consider how much time it takes to service or upgrade a traditional kiosk, you can

virtually see thousands of dollars going out the window as technicians have to un-plug, un-screw, break apart, and remove components piece by piece to locate and diagnose a problem.

With the DigiPoS Kiosk you simply unlock/open the Kiosk, unlock the Retail Blade and swap out the motherboard, hard drive, or power supply in literally seconds.

Have you considered that Kiosks would help grow your retail business, better inform your customers, or allow targeted marketing campaigns to reach your customers at certain locations - but you were concerned with high integration costs and system stability across all the various platforms? Consider the Retail Blade Kiosk. Wouldn't you want the highest ranked POS system on the market for not only your point of sale system, but your self-service?

The facts

DigiPoS Store Solutions Retail Blade is the ONLY Point of Sale platform that enables Retailers to maintain compatibility, configurations and installations while extending the performing life of their PoS investments.

This Retail Blade Kiosk solution is aimed at retailers with a need for high performance and maintainability at the self-helped point of service. With a future proofing approach to current needs and confidence that simple changes are possible to have, your PoS capability will grow with your unique retailing needs.

In DigiPoS, those retailers have a true technology Partner capable of delivering across the retail

technology spectrum. This is evidenced in the Retail Blade Store System Architecture for example which provides a consistent, flexible and high ROI platform for integration into the store environment. At the centre of the solution is the award winning Retail Blade which now drives technology in-store from PoS through to Self Checkout, creating a powerful combination of options for the Retailer and delivering consistency right across the enterprise.

The features

- Easy integration with existing store systems
- Flexible design allows for printers, scanners and payment functions
- Simple serviceability
- 3 year warranty
- External power supply
- Award winning technology
- Open platform provides flexibility to operate with any Operating System
- Easy swap motherboard, hard drive and power supply
- Lockable front cover
- Configurable to the Customers' requirements
- Outstanding return on investment

"The DigiPoS Kiosk is packed with Retail Functionality and provides serviceability in ways no other system is able to provide in a kiosk solution."
