DigiPoS: Scanning, mobility and wireless solutions

DigiPoS: The Symbol Solution Provider

DigiPoS Systems Group only operates in the field of Retail Technology. It is this specialist focus that enables the business to bring exceptional value to Retailers by working along side them in achievement of their commercial objectives through the implementation of technology. In the history of Retailing, technology has not played a more important role in customer service, reduction in costs and improvement profits than it does today. However deployment of solutions to achieve these objectives need a business case and demonstrable return on investment bought about by working with supplier-partners that fully appreciate the dynamics, issues and challenges of the sector.

It is these principles that the DigiPoS Systems seek to identify in technology partners the Group operates with. They were clearly seen in the relationship forged with Symbol Technologies one of the foremost suppliers of mobility, scanning, wireless and support services for Retailers globally.

The combination of DigiPoS store-wide Retail expertise and the range and scale of Symbol products are a powerful combination to ensure that Retailers stay ahead in the delivery of their technology solutions - and have the confidence of two World Class organizations behind them.

**“Symbol Manufactures world class
technology for retail - delivered by the award
winning DigiPoS Systems Group”**

Store Solutions from DigiPoS

DigiPoS Systems - Microsoft's "Technology Innovator of the Year '05" has built a world-wide reputation for quality, innovation and highly responsive service. The award winning DigiPoS Retail Blade POS system continues to be installed by many of the worlds leading Retailers.

As the demand for the system has grown, so Retailers have relied more heavily on DigiPoS for broader system solutions such as scanning, mobility and wireless technologies. Working as a leading Symbol Solution Provider - DigiPoS now drives additional productivity, efficiency and profitability via the Symbol range including

- Barcode Scanners
- Mobile Solutions
- Wireless Infrastructure

Each of these individual areas is now critical to store operations and is central to the full technology service capability delivered by the DigiPoS Systems Group. Working closely with DigiPoS, Retailers can now deliver critical information to Store Management, significantly improve systems and communication across the whole supply chain, and even place productivity tools directly into the hands of customers.

Scanners

- Symbol Handheld Scanner for Point of Sale applications in store
- Symbol Hands Free Scanners for fast processing and improved productivity
- Rugged Corded and Cordless units from Symbol for scan intensive warehouse and storage environments

Mobility

Of increasing in-store and warehouse applications, DigiPoS also delivers the full range of Symbol Mobile computing options.

- Mobile systems capable of delivering mission critical data and real-time visibility
- Enterprise PDA's for Management with a wide range of rugged designs for on the go professionals
- Consumer portable shopping systems to enhance the customer experience and increase customer loyalty

Wireless

Symbol's award winning range of wireless networking products delivers cost effective communication right across the retail enterprise and incorporates:

- Ranging from single wireless switches with integrated security wireless LAN architecture for servers
- Full range of access ports and points for enterprise class wireless networking
- Bridges, client adapters and Intrusion protection for 802.11a/b/g wireless infrastructure
